

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A computer-implemented method for displaying data associated with an electronic program guide, comprising:

~~displaying movable-hour and minute sliders, each slider having a movable slide knob and two ends; slide knobs positioned on a representation of an analog clock with an hour hand and a minute hand concurrently with the electronic program guide, the movable hour and minute slide knobs corresponding to the hour hand and the minute hand, respectively, the hour hand and the hour slide knob incrementing or decrementing upon each travel of the minute slide knob representative of sliding 60 minutes;~~

~~displaying a currently set hour value on the movable slide knob of the hour slider based on a position of the hour slider's movable slide knob in between the hour slider's ends, and displaying a currently set minute value on the movable slide knob of the minute slider based on a position of the minute slider's movable slide knob in between the minute slider's ends;~~

~~displaying electronic program guide data corresponding to the currently set hour value and currently set minute value displayed on the respective movable slide knobs; a position of the one or more moveable slide knobs on the analog clock; and~~

~~receiving user input corresponding to a drag of one of the movable slide knobs to a new position in between the slider's ends;~~

~~updating the display of the dragged movable slide knob by changing the value displayed on the dragged movable slide knob based on the new position in between the slider's ends; and~~

~~updating the displayed electronic program guide wherein said data to correspond eorresponding to the position of the moveable slide knob on the analog clock is changed value on the dragged in a frame buffer or a video buffer as a user changes a position of said one or more moveable slide knob. knobs on the analog clock;~~

2. (Canceled)
3. (Currently Amended) A device for displaying data associated with an electronic

program guide, comprising:

a display configured to display moveable-hour and minute sliders, each slider having a movable slide knob and two ends, slide knobs positioned on a display representing an analog clock with an hour hand and a minute hand of said device for controlling the display of data concurrently with program guide data, the movable hour and minute slide knobs corresponding to the hour hand and the minute hand, respectively, the hour hand and the hour slide knob incrementing or decrementing upon each travel of the minute slide knob representative of sliding 60 minutes;

wherein the display is further configured to display a currently set hour value on the movable slide knob of the hour slider based on a position of the hour slider's movable slide knob in between the hour slider's ends, and to display a currently set minute value on the movable slide knob of the minute slider based on a position of the minute slider's movable slide knob in between the minute slider's ends,

wherein the a-display is further configured to present electronic program guide data corresponding to the currently set hour value and currently set minute value displayed on the respective movable slide knobs; a position of said one or more moveable slide knobs on the analog clock; and
an input device configured to receive user input corresponding to a drag of one of the movable slide knobs to a new position in between the slider's ends;

wherein the display is further configured to update the display of the dragged movable slide knob by changing the value displayed on the dragged movable slide knob based on the new position in between the slider's ends,

wherein the display is further configured to update the presentation of said electronic program guide data to correspond corresponding to the position of the moveable slide knob on the analog clock is data from an electronic program guide which is changed value on the dragged in a frame buffer or a video buffer as a user changes a position of said one or more moveable slide knob, knobs on the analog clock.

4-6. (Canceled)

7. (Currently Amended) A system for displaying data associated with an electronic program guide, comprising:

means for displaying moveable-hour and minute sliders, each slider having a movable slide knob and two ends; slide knobs positioned on a representation of an analog clock with an hour hand and a minute hand concurrently with the electronic program guide, the movable hour and minute slide knobs corresponding to the hour hand and the minute hand, respectively, the hour hand and the hour slide knob incrementing or decrementing upon each travel of the minute slide knob representative of sliding 60 minutes;

means for displaying a currently set hour value on the movable slide knob of the hour slider based on a positioning of the hour slider's movable slide knob in between the hour slider's ends, and for displaying a currently set minute value on the movable slide knob of the minute slider based on a positioning of the minute slider's movable slide knob in between the minute slider's ends;

means for displaying electronic program guide data corresponding to the currently set hour value and currently set minute value displayed on the respective movable slide knobs; a position of the one or more moveable slide knobs on the analog clock; and

means for receiving user input corresponding to a drag of one of the movable slide knobs to a new position in between the slider's ends;

means for updating the display of the dragged movable slide knob by changing the value displayed on the dragged movable slide knob based on the new position in between the slider's ends; and

means for updating the displayed electronic program guide wherein the data to correspond corresponding to the position of the moveable slide knob on the analog clock is changed value on the dragged in a frame buffer or a video buffer as a user changes a position of said one or more moveable slide knob, knobs on the analog clock;

8. (Canceled)

9. (Currently Amended) A computer-readable medium having stored thereon a plurality of instructions for displaying data associated with an electronic program guide, said plurality of

instructions when executed by a computer, cause said computer to perform:

~~displaying moveable-hour and minute sliders, each slider having a movable slide knob and two ends; slide knobs positioned on a representation of an analog clock with an hour hand and a minute hand concurrently with the electronic program guide, the movable hour and minute slide knobs corresponding to the hour hand and the minute hand, respectively, the hour hand and the hour slide knob incrementing or decrementing upon each travel of the minute slide knob representative of sliding 60 minutes;~~

~~displaying a currently set hour value on the movable slide knob of the hour slider based on a positioning of the hour slider's movable slide knob in between the hour slider's ends, and displaying a currently set minute value on the movable slide knob of the minute slider based on a positioning of the minute slider's movable slide knob in between the minute slider's ends;~~

~~displaying electronic program guide data corresponding to the currently set hour value and currently set minute value displayed on the respective movable slide knobs; a position of the one or more moveable slide knobs on the analog clock; and~~

~~receiving user input corresponding to a drag of one of the movable slide knobs to a new position in between the slider's ends;~~

~~updating the display of the dragged movable slide knob by changing the value displayed on the dragged movable slide knob based on the new position in between the slider's ends; and~~

~~updating the displayed electronic program guide wherein the data to corresponding corresponding to the position of the moveable slide knob on the analog clock is changed value on the dragged in a frame buffer or a video buffer as a user changes a position of said one or more moveable slide knob. knobs on the analog clock.~~

10. (Canceled)

11. (Currently Amended) The computer-implemented method as in claim 1, further comprising, displaying the a plurality of movable slide knobs on the analog clock concurrently with the electronic program guide, wherein each moveable slide knob ~~on the analog clock~~ corresponds to a different incremental value.

12. (Currently Amended) The device as in claim 3, wherein the display is further configured to display the comprising a plurality of movable slide knobs concurrently with the electronic program guide, and on the analog clock, wherein each movable slide knob ~~on the analog clock~~ corresponds to a different incremental value.

13. (Currently Amended) The system as in claim 7, further comprising, displaying ~~the a~~ plurality of movable slide knobs ~~on the analog clock~~ concurrently with the electronic program guide, wherein each movable slide knob ~~on the analog clock~~ corresponds to a different incremental value.

14. (Currently Amended) The computer-readable medium as in claim 9, said plurality of instructions further causing the computer to perform displaying the comprising a plurality of movable slide knobs ~~on the analog clock~~ displayed concurrently with the displayed electronic program guide, wherein each movable slide knob ~~on the analog clock~~ corresponds to a different incremental value.

15-19. (Canceled)

20. (Currently Amended) The system of claim 7, further comprising means for displaying a minute hand grab mechanism.

21-24. (Canceled)

25. (New) The computer-implemented method of claim 1, wherein the movable slide knob of the minute slider is draggable in five-minute increments.

26. (New) The computer-implemented method of claim 1, wherein the only numerical values displayed on each slider are values displayed on the slider's ends and the value displayed on the movable slider knob.

27. (New) The computer-implemented method of claim 1, wherein the electronic program guide data corresponds to television program listings.
28. (New) The device of claim 3, wherein the movable slide knob of the minute slider is draggable in five-minute increments.
29. (New) The device of claim 3, wherein the only numerical values displayed on each slider are values displayed on the slider's ends and the value displayed on the movable slider knob.
30. (New) The device of claim 3, wherein the electronic program guide data corresponds to television program listings.
